

SOWERS

FOR CONGRESS 2026

***The
Common Sense
Policy Booklet***

INTRODUCTION

This booklet shares Brandon Sowers' plan for Congress in 2026. It's written in plain language so every voter can understand what we stand for: honesty, unity, and common sense. We believe America works best when people—not lobbyists or corporations—guide the future.

This plan is about bringing jobs home, cutting waste, protecting our freedoms, and restoring faith in government.

Economy: Sound Money and Fair Growth

The Problem: Prices are up, savings buy less, and Washington keeps printing money. Big banks get bailouts while regular families struggle.

Our Plan:

- Make the U.S. dollar strong again by exploring gold or energy-backed systems. Real assets like oil, gold, or minerals can back our currency and protect families from inflation.
- Tokenize parts of America's oil reserves to create digital, trackable assets that strengthen our national wealth.
- Stop wasteful spending and balance the budget. The government should live within its means just like families do.
- Support small businesses and local banks that keep jobs in our communities.

Healthcare: Transparency and Choice

The Problem: Healthcare costs too much and confuses everyone. Bills are hidden, hospitals act like corporations, and families can't see prices upfront.

Our Plan:

- Require clear price lists for hospitals and clinics so patients know costs before treatment.
- Allow doctors to open and run their own hospitals again. Physician-owned care lowers prices and raises quality.
- Cut out middlemen who inflate costs, like insurance and pharmacy benefit managers.
- Protect seniors by keeping Medicare strong and stop fraud and waste.

Energy: Power Up America

The Problem: Energy prices rise when we depend on other countries. We need affordable power and clean solutions.

Our Plan:

- Support new small modular nuclear reactors—safe, modern, and zero carbon.
- Invest in American oil, gas, solar, and nuclear energy so we never rely on foreign powers.
- Speed up permits for new energy projects to lower costs and create jobs.
- Protect the environment with smart, balanced policy—clean air and water without crushing families or businesses.

Education: Back to Basics

The Problem: Students are falling behind in reading and math. Teachers are overworked and underpaid.

Our Plan:

- Focus on reading, writing, math, and practical life skills.
- Pay and train good teachers and give schools better resources.
- Offer job and trade training so every student has a path to success.
- Give parents more say in education decisions.

Immigration and Border Security

The Problem: Our borders are not secure, and the immigration system is broken.

Our Plan:

- Secure the border with better technology, fencing, and staffing.
- Fix the legal system so immigrants who follow the rules don't wait years.
- Offer earned legal status for Dreamers and long-term residents who obey the law and contribute.
- End the chaos at the border while keeping compassion for families.

Public Safety and Crime

The Problem: Crime, drugs, and violence hurt too many families.

Our Plan:

- Support police with training and resources to keep neighborhoods safe.
- Enforce strong background checks for all gun buyers while protecting law-abiding citizens' rights.
- Crack down on drug traffickers and expand treatment for addiction.
- Strengthen youth and community programs that prevent crime.

Technology, Privacy, and Freedom

The Problem: Big Tech collects personal data and controls what people see. AI is changing the world fast.

Our Plan:

- Protect every citizen's right to own and control their data.
- Require transparency in AI systems—people should know when content is made by machines.
- Ban government and corporate surveillance without a warrant.
- Support ethical tech that helps people, not manipulates them.

Integrity and Government Reform

The Problem: Too many in Congress serve special interests, not the people.

Our Plan:

- Ban stock trading and corporate lobbying by elected officials.
- Support term limits for Congress and stop the revolving door between government and big business.
- Require full financial transparency—every dollar raised or spent should be public.
- Encourage citizen leaders, not career politicians.

Unity and Patriotism

The Problem: America is divided, and leaders often fuel that divide.

Our Plan:

- Promote civil conversations and respect differences.
- Support service programs and community volunteering to bring people together.
- Honor veterans, workers, and families who keep the country strong.
- Put America first—united, free, and proud.

Conclusion

This plan is about bringing common sense back to government. We will fight for everyday Americans, protect freedom, and keep our country strong for future generations.

Together, we can restore faith, unity, and prosperity—one step at a time.
